Why Use Our Product?

Appliances are some of the most costly items one can purchase whether for the home or for a commercial business. When this equipment breaks down it is costly to repair or replace. Therefore, ensuring the highest degree of longevity of your appliances is a wise investment.

By reducing the amount of heat running through the wires and motor, the longevity of your appliances are greatly enhanced.

Best of all, not only do you increase the longevity, you save money on your electric bill!

COMMERCIAL APPLICATIONS

Refrigeration

Air Conditioning

RESIDENTIAL APPLICATIONS

Air Conditioning

Pool Pump

Features & Benefits

Instant Cost Savings

The Kill-A-Watt Box is designed to work the moment it is installed. Once done it'll get to work immediately.

Power Surge Protection

Some of your biggest investments are appliances. Protect them from power surges and prolong their life.

Made In The USA

The Kill-A-Watt Box is produced and manufactured in the USA. By buying American, you are ensured a high quality product and are supporting our national commerce and structure

Warranty on Defects

All orders come with a 20 year warranty card and installation instructions.

UL Safety Certification

This product is 100% fully UL and CuL certified with a clear and prestigious safety certification. Having the Kill-A-Watt Box installed by a licensed professional will never harm your insurance.

Simple Installation

For your own peace of mind, we strongly suggest hiring a licensed electrician to install the Kill-A-Watt Box. The installation is basic and should take about 20 minutes.

Works On All Electric Meters

Whether you have the old 'dials' or digital meter, or even the new 'smart' meters, the Kill-A-Watt Box is not trying to fool your meter in any way but is using proven scientific principles to reduce your electric demand.

Maintenance Free

The Kill-A-Watt Box is a "Fit and Forget" technology. Once installed, nothing more is required on your part. The unit operates without further care or attention.
